

ABB

ABB is a leader in power and automation technologies that enable utilities to improve performance while lowering environmental impact. ABB's portfolio covers variable speed drives, motors and generators, low voltage products, instrumentation and analytical. Other products help transmit and distribute electricity from transformers to switchgear. ABB also offers turnkey systems and services for power transmission and distribution grids, and for power plants.

Advanced Component Technology Ltd

ACT Ltd design and manufacture a wide range of Electro-Hydraulic Actuators in both linear and semi rotary format. Stroke length up to 4 metres and thrusts of 90,000 kg. Rotary Actuators up 90,000 Nm of torque and can include features such as , fail-safe, modulating and manual over ride. The self-contained units have been designed to work "in cell" at Sellafield plus we have designed and manufactured hydraulic system using pure water as the medium.

Assystem UK Ltd

Assystem UK has operated in the Nuclear and Energy sectors for over 40 years, and provides a complete range of engineering design, build and test facilities.

Listed below are some of the areas in which extensive experience has been gained:-

- Waste retrieval and processing
- Remote handling
- In reactor inspection and repair
- Decommissioning
- Shield doors
- Transport systems

Institute of Measurement & Control

The Institute of Measurement & Control - Britain's foremost professional body for the Automation Industry - provides members with routes to Engineering Council registration as Chartered and Incorporated Engineers, and Engineering Technicians.

The Institute is not tied to a single application area, nor is it limited in the technologies and disciplines it may embrace.

Any application or technique of measurement and control falls within its scope of interest.

The Institute brings together thinkers and practitioners from the many disciplines which have a common interest in measurement and control. It organises meetings, seminars, exhibitions, and national and international conferences on a large number of topics. It has a very strong level of local section activity, providing opportunities for interchange of experience and for introducing advances in theory and application.

It provides qualifications in a rapidly growing profession and is one of the few Chartered Engineering institutions which has long welcomed and qualified Incorporated Engineers and Engineering Technicians as well as Chartered Engineers.

Sellafield Ltd

External Innovation - Driving Sellafield Ltd performance through Supply Chain engagement.

External Innovation in Nuclear Decommissioning and Operational areas is essential in delivering solutions to technical challenges as well as efficiencies in delivering the overall business.

It is delivered by working in partnership with the Supply Chain & Academia to identify and optimise incremental, radical and breakthrough Innovative solutions or potential technology transfer opportunities.

As a working partnership both Sellafield Ltd and the supply chain community gain benefit from collaborative involvement and reap the benefits of team working and shared financial gain.

Sellafield Ltd

Commercial and Contract Management Quality

Commercial and Contract Management Quality are an integral part of the Sellafield Limited Procurement process. We provide support for the application of Quality Grading to the procurement of goods and services.

This is a risk based approach that engages appropriate controls to offset the level of risk associated with a procurement activity. We are engaged in the assurance activities relating to the Sellafield limited supply chain.

Examples of the areas of involvement include supplier assessment, performance monitoring and review, audit, evaluation and approval. We also maintain the Sellafield Limited Quality approved supplier listing.
